

Model: HSD-502-01

1%RH, 510L

HSD-502-01 has an outstanding performance for drying moisture sensitive components and PCBs as a result of a high performance drying unit. Humidity can be controlled precisely by digital panel to reach the lowest 1%RH. It is specially designed for moisture sensitive SMD packages to comply with IPC/JEDEC J-STD-033D. Two powerful dry units installed, making it very suitable for operation with frequent approach.

Totech (Toyo Living) is the creator of world's first Automatic Drying System invented in 1974.

Super Dry cabinets use the highly-quality and highly reliable Toyo Living engine and has been sold over 700,000 units and used in over 10,000 companies around the world. We also supply various kinds of custom-build cabinet to best suit our client's need.

Features

❖ **Modular design:** Totech Super Dry is modularly designed dry cabinet. The main modules include dry units, control box, sensor and shelves. All of the modules can be replaced easily. Totech dry cabinet can be used as long as the cabinet structure is in good condition. Most of our customers can use the Totech dry cabinets for more than 10 years without any problem.

❖ **Humidity control:** 1%RH.

❖ **ESD safe design:** Cabinet is with ESD metal painted steel body, ESD safe steel shelves and ground wire, well comply with IEC 61340-5-1.

❖ **Convenient Operation:** Totech Super Dry cabinet is with digital control panel, can control the humidity precisely from 1% to 50%RH, by adjusting $\pm 0.1\%$ RH. Humidity, temperature and alarm functions are shown and can be adjusted by digital control panel. Key Lock function on the digital control panel prevents unintended changes of setting. Sensor calibration function is also available with digital panel.

❖ **Maintenance free design:** Totech dry cabinet works by dry units. An interlocked fan causes the air to circulate through the dry unit, while passing through the dry unit moisture in the air is absorbed by the zeolite desiccant. During periodic regenerating of the zeolite desiccant by heating, the absorbed humidity is evaporated and exhausted through the external shutters of the dry unit. The process is physical, and no extra maintenance at all.

❖ **Lockable doors:** Every door can be locked separately with a key.

❖ **Humidity alarm (Optional):** Humidity alarm buzzer / humidity alarm light will sound or flash if the humidity exceeds set value.

Applications
